- **Operational Assessment** of all perioperative functions to enhance facility, staff, and anesthesia provider utilization as well as surgeon personal productivity
- **Technology & Facility Pre-Architectural Planning/Programming** including function and space programming, equipment specifications, regulatory compliance, and facility impact on clinical services
- **Surgery Information System** implementation and optimization
- **Surgeon Practice Consultation** including business planning, practice development, market assessment, and practice operations improvement
- **Ambulatory Surgery Services** assessment and operations improvement to enhance patient experience and surgeon productivity
- **Service Line Consolidation** identifying potential for improved clinical and financial performance
- **Interim Operating Room Leadership** at both the administrative and director levels
- **New Manager Mentoring** via structured on- and off-site education, coaching and leadership-by-example, as well as succession planning for the operating room
- **Clinical Quality Assessment** including formation of an effective structure and process and physician-to-physician review
- **Anesthesiology Program Consulting**; staffing adequacy, contract review, pre-screening program development
- **Sterile Processing** review for standards compliance, efficiency & effectiveness, and staffing appropriateness

Sue Smith, Partner

DCCS Surgery Management Improvement Group

John Gialanella, Partner

DCCS Surgery Management Improvement Group

Sue Smith has over 25 years of healthcare and surgery program experience. Her vast hands-on experience had a significant impact in her consulting engagements at D.J. Sullivan & Associates and Johnson & Johnson Health Care Systems Inc. Consulting and Services Division.

As Principal of the Surgery Management Improvement Group, she is responsible for the Clinical Programs & Operational Consulting and Services provided by perioperative consultants.

John Gialanella has deep knowledge of directing patient acuity-based nurse staffing projects, medical staff management, and operating room analysis projects for hospitals of various sizes.

As a Senior Consulting Executive for Surgery, John focuses on client need identification and work plan development. He is responsible for overall engagement outcomes directing project and implementation team efforts for single and multi-hospital systems.
