

Elevate Your Surgery Financial Outlook with DCCS Supply Chain Solutions

As the largest margin producing department, it is critical to align the surgeons, staff, and supply chain into a winning formation.

DCCS Surgery Management Improvement Group delivers clinically focused, cost effective processes through collaboration with key stakeholders.

Our trusted supply chain partner, **Ron Denton & Associates (RDA)**, provides expert expense reduction, process optimization and asset technologies.

Together, we work with your leadership to facilitate a successful alignment between clinicians and supply management.

DCCS Surgery Supply Chain Optimization

MAXIMIZED Operating Margin

DCCS experts implement an effective process around managing vital resources and reducing non-labor expenses.

COHESIVE Inter-Department Communication

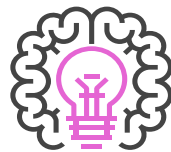

DCCS facilitates a relationship between the Surgery Department and Hospital Operations that supports transparency, accountability and establishes mutual goals for success.

A RESILIENT Supply Chain

DCCS integrates processes between the Surgery and Supply Chain Departments that result in a reliable supply chain with the right product, in the right place, at the right time.

OPTIMIZED Inventory & Space

DCCS optimizes inventory, space, and associated labor with a cloud-based solution, Demand Logic™. This comprehensive, sustainable approach maximizes storage space and optimizes inventory and workflow utilizing lean methodologies to improve clinical satisfaction.
